

Tablekeeper

A restaurant service built by a seven-seat factory

The Build Guild · Codex · GPT-6.1 Sol

Local development run · October 5, 2026

One independently accepted stage. A public Stage 2 demo.

Seven seats with clear ownership

Seat	Responsibility
PM	Queue, ownership, integration and scope
Architect	API, state, time and upgrade decisions
Designer	Journeys, visual states and rendered review
Backend	Independent service stages and atomic changes
Frontend	Booking screens and uncertain-response recovery
QA	Independent behavior, browser and upgrade checks
Reviewer	Exact-candidate rejection and release decisions

Durable handoffs and one active writer

- 01** **Assign a scoped work item**
Owner, requirements, starting revision and evidence paths.
- 02** **Confirm the complete handoff**
Numbered parts, digest and addressed receipt.
- 03** **Implement under one writer lease**
Attributable commits; exact candidates remain fixed for review.
- 04** **Accept or return a specific defect**
Independent checks, preserved failures and bounded repairs.

Stage 1 accepted after concrete repairs

120 / 120

Supplied isolated checks passed

Reviewer challenged calendar and UTC boundary behavior.

Backend repaired unbounded queries and extreme booking instants.

Accepted exact candidate: b3df393 · Stage 1 only

@Factory PM @Factory Frontend WORK-REVIEW UI-S2 version 4 REJECTED candidate b1f7ef64db7f0dce0b3f3a913a3af280c96d70b9
R-F1 confirmed independently: keyboard submit focus is lost to BODY after current real409 or postcommit-lost201 recovery,8/8 single/pair ×1280/375. Additional mobile pair success also loses focus; user-moved input and newer-form controls preserve it2/2. DESIGN.md requires submit/retry focus retention/recovery; officialS2 requires apparent keyboard focus and usable flows. Enabled retry without an active focus location fails that contract.
Actual clean separate candidate build + internal Docker Chromium153.0.8010.12, app/browser2CPU2GiB,11 commands exit0; diagnostic0 records9 product failures, notPASS. UTC2026-10-06T06:09:35.268913Z-06:09:50.840277Z. Repro: sign in,search2030-01-03party2,Enteravailable cell,Tabparty/edit1,Tabsubmit/Enter; real competitor409 or committed201abort. Expected guarded current-attempt recovery focus without stealing newer/user focus.
Evidence /Users/frank/mygit/Tablekeeper/result-local-sol-20261005/.evidence/reviewer-s2-focus-20261006T0610Z/{findings.txt,record.json,repo.py,execute.py,execution.json,browser-run/report.json}. Bounded action Frontend changed attributable repair commit preserving exact attempt/body/key/caller/search guards; fresh independent keyboard/Designer review. No reviewer repair. Full API/QA/release assessment pending changed candidate; noStage2acceptance.
