Tablekeeper Factory

Run 3 evidence review

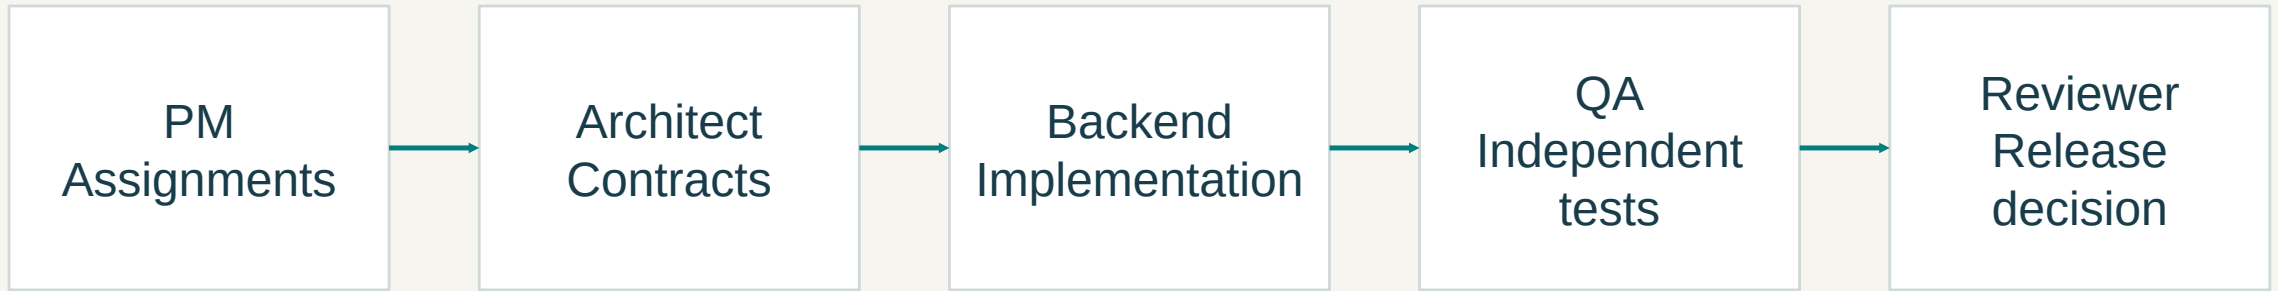

Stage 1 accepted
4 October 2026

A reservation API with a bounded scope

Delivered in Stage 1	Evidence scope
Search and booking	Availability, reservations and ownership
Changes and retries	Atomic amendments and original receipts
Time and portability	Timezone rules and state transfer
Standalone container	Dockerfile, RUN.md and packaged runtime

**Stage 2 has architecture and design plans only.
No Stage 2 application or browser UI exists.**

Seven seats, one active writer

Stage 1 work moved through separate owners and reviewers.

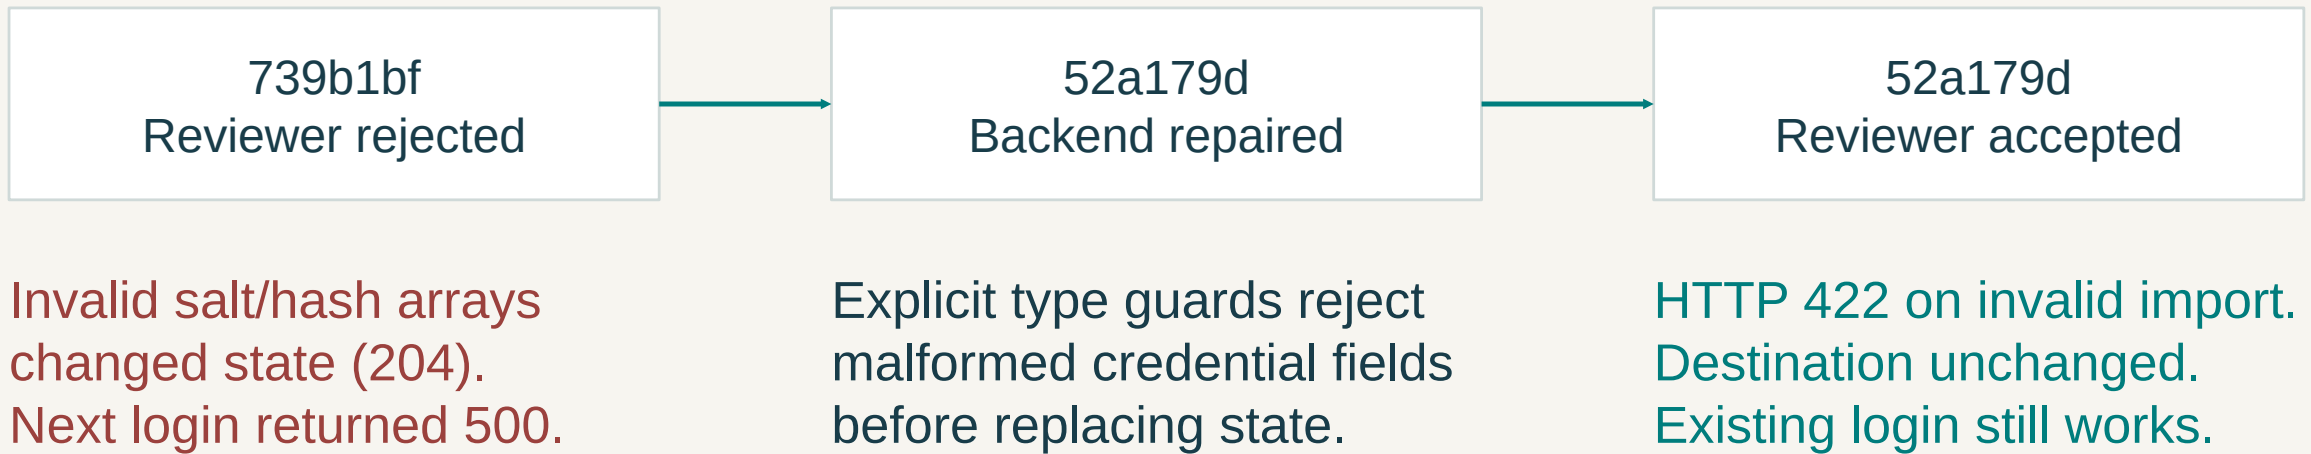

Designer authored Stage 2 plans.

Frontend remained registered with no Stage 2 implementation.

All seven: gpt-6-astra on Codex 0.160.0 and BAND SDK 4.0.0

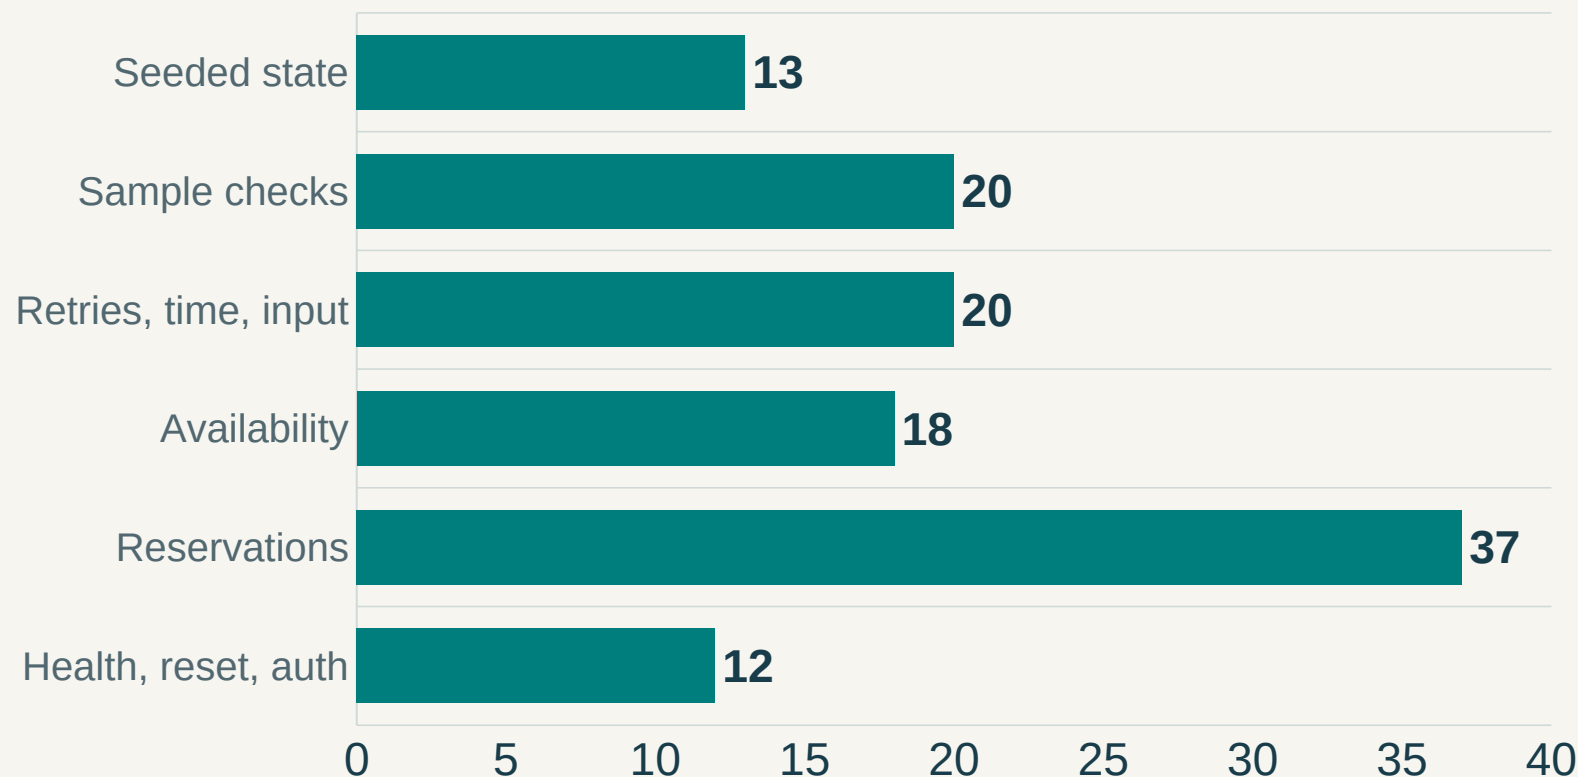

Independent review changed the result

F1: imported credential fields accepted the wrong JSON type

The prior rejection and repair commit remain in the evidence and Git history.

120 official checks passed on the accepted commit

120 / 120

0 failed
0 skipped
Isolated Docker

52a179d
Exact accepted candidate

Fresh remote clone: 120/120 again, with the same Stage 1 tree at 27f677a.

A receipt timer stopped Run 3

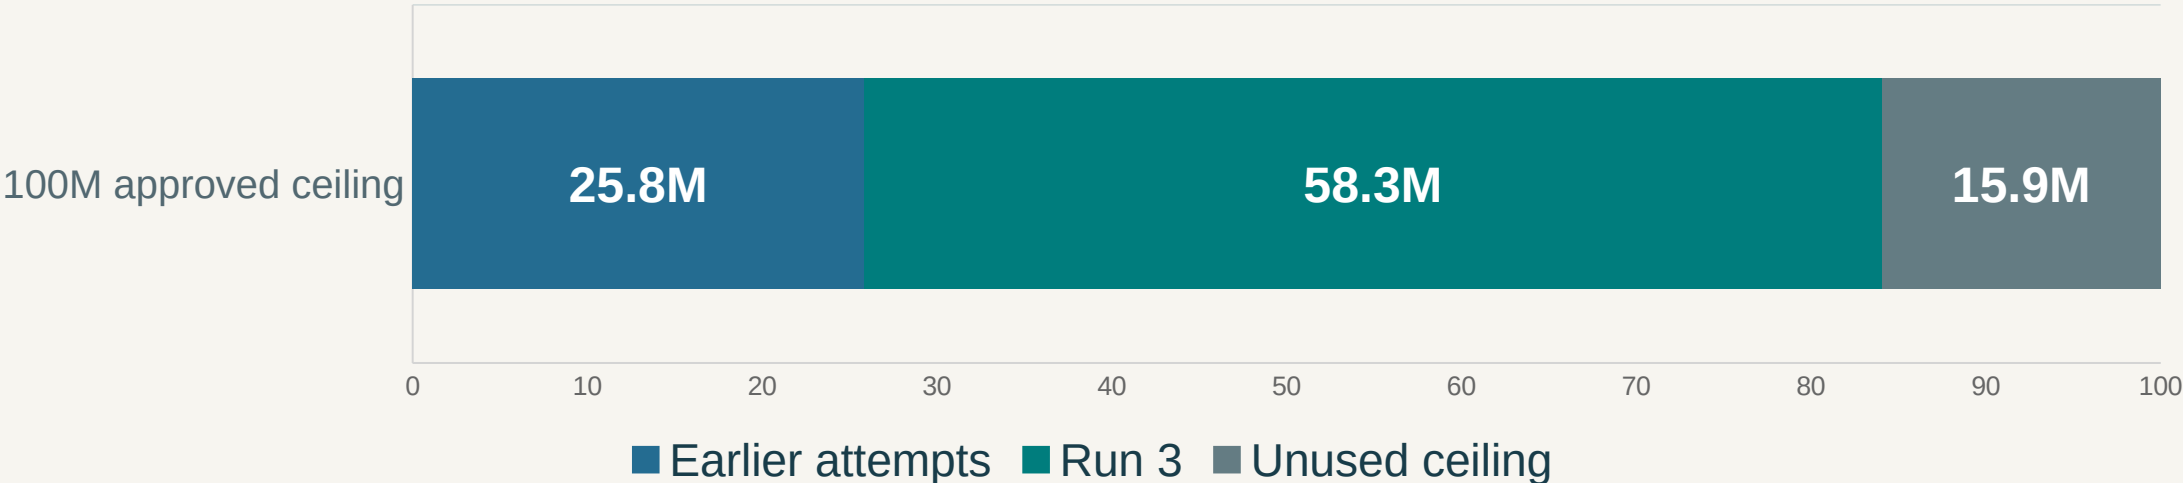

UTC on 4 October	Observed milestone
06:38:46	One complete initial dispatch
07:45:04	Reviewer rejects the first candidate
08:07:29	Reviewer accepts the F1 repair
08:47:13	Owned workers stop with workflow blocked

At stop: 12 confirmed parts sent, 8 Backend callbacks completed.

The receipt deadline matured during callback 6. Coordinator recovery blocked.
Stage 2 remained at planning only.

84.08 million reported tokens across all attempts

Run 3 added 58,265,038 tokens. Previous consumption remained counted.

Subscription only. API billing and paid provisioning disabled.

Reported tokens include cached input. Monetary cost is unavailable.
The approved runtime window has expired, including for unused token capacity.

The evidence package supports Stage 1

Available evidence	Remaining participant work
Accepted Stage 1 candidate Exact review and isolated checks	Review AI-assisted narrative drafts Participant authorship unresolved
4,088-message full room export One human text: initial dispatch	Record the API and evidence walkthrough No Stage 2 UI demonstration
Final package passes offline check Stage 1 tree unchanged	Finish participant review and release steps Public submission remains unclaimed

Pinned guide: 803560d2a678ace1414465c098eb0ab5380ffade

AI-assisted drafts are complete. Participant review and authorship remain unresolved.
